SIDE BY SIDE

Monthly cost, before and after each swap

CRM

$90 HubSpot
$0 Twenty

Support inbox

$390 Intercom
$0 Chatwoot

Forms

$59 Typeform
$29 Tally

Team AI chat, 5 seats

$150 ChatGPT Team
$12 Open WebUI + API

Cloud hosting

$1,621 AWS on-demand
$6 Hetzner VPS

Hosting is the quiet killer. One $6 VPS runs the CRM, the inbox and the AI chat for a 5-person team.

THE NUMBER

98%

of this agency's software bill disappeared. $2,263 a month, back in the business.

Vendor list prices, Nov 2026. Hosting at Hetzner CX22.

DO IT THIS WEEKEND

Four steps, one afternoon

01 Rent one small VPS (Hetzner CX22 or similar, about $6/mo).

02 Install Docker and start Twenty.

```
git clone twentyhq/twenty && make up
```

03 Start Chatwoot on the same box.

```
docker compose up -d
```

04 Point your domain, import HubSpot CSV, add the chat widget. Cancel the old tools next month.

Time: 3 to 4 hours. Skills: copy and paste.

WHY THIS WORKS

Most small businesses do not have a software problem. They have a pricing-page problem.

— 10x Cheaper

One swap a day. Free when possible, cheap when not.

Save this. Send it to whoever approves the software budget. Repo and pricing links in the first comment.
